Andrei. Electrician from Belarus

About Me

I have over 6 years of experience not as a software engineer, and I haven't worked at small startups or large organizations. I'm a sufficiently proficient electrician, my expertise is in repairing and mounting electrical equipment (industry and substation hardware).

I want to try myself in software engineering, because I have got some experience as I'm studying in university. This sector seems to be interesting for me.

Interests

My personal interests include:

- **Soldering**. I'm glad when I have repaired something and it can work again.
- **Jogging and workout**. It can help me wake up and feel better in the morning.
